

BE **B**ridging
Organisational
Learning and
Design
Summit

Bridging organisational vision, pedagogy
for learning and space design.

Bridge the gap between modern school design and cutting-edge teaching and learning.

Effective teachers are vital to successful learning, in combination with classrooms and schools designed for effective teaching.

ISV's BeBOLD Summit will help transform your school design to create learning environments aligned with your school's vision for learning.

Together with US-based Teaching and Learning Designer, Dr Marilyn Denison, we will unpack the tools and strategies behind the innovative, BOLD process – Bridging Organisational Learning and Design.

By focusing on learners and the unique features of your school's location, our strategic collaborative process will help you design building spaces geared towards teaching and learning that stand the test of time.

Our inside-out design process will ensure that your school's systems are aligned with your new vision, ensuring a seamless transition to new approaches to teaching and learning.

Are you ready to bring your vision for school design to life with BeBOLD?

Key takeaways

Use divergent thinking and research-informed design to articulate your 'why' for creating innovative learning environments.

Leverage an inside-out design process to align your school's systems with your new vision for learning.

Learn tools to support new approaches to teaching and learning in innovative learning environments.

Explore real school case studies to better understand what matters most in learning and space design.

Your facilitator

Dr. Marilyn Denison

Teaching & Learning Designer

Dr. Marilyn Denison is a Teaching & Learning Designer and a key member of DLR Group's BOLD (Bridging Organisation, Learning and Design) team. Since she started with DLR Group, Marilyn has been in high demand across offices nationwide to help school districts define their goals and vision to ensure new or remodelled facilities support their learning model.

Marilyn was a career educator in several districts across Texas, and her last position before joining DLR Group was as Assistant Superintendent in Coppell ISD, overseeing curriculum and instruction. She says she feels fortunate with her background of opening new and renovated campuses that transformed teaching and learning models.

“ I think I really connect with educators because I have been through exactly what they are undertaking, and I can help them articulate and realise their vision in conjunction with the architecture, planning, and design teams.
