

LEAD School Effectiveness Surveys

Gain a holistic view of your school's performance

ISV's LEAD School Effectiveness Surveys are an essential school improvement tool, developed by and for Independent schools.

The full suite of LEAD surveys provide a powerful measure of school effectiveness and enable you to review your school's performance, benchmarked against other Independent schools.

With valuable and validated insights from students, staff and parents, the LEAD surveys support you to make informed decisions and match your school's perceptions against performance.

What are the benefits?

- 1 Gain a 360-degree view of your school's performance through the eyes of students, staff and parents.
- 2 Make informed decisions, and determine how perceptions match up to reality, with a customised LEAD report for your school.
- 3 Get access to a custom-built analytics platform to interrogate your data.
- 4 Benchmark your school against almost 400,000 respondents from Victoria's Independent schools sector.
- 5 Obtain key insights into core elements of an effective school, using standard measures validated by the University of Cambridge.

What does LEAD measure?

The full suite of LEAD surveys measure:

- Student satisfaction with their learning, pastoral care, peer support, discipline and safety, and more
- Year 12 exit survey, measuring students' satisfaction with their time at your school
- School staff satisfaction with their workplace and the school in general
- Parent opinions on your school and its learning outcomes
- The health of your school's governance system.

We encourage schools to participate in the full suite of surveys to ensure you gain the full benefit. However, school can select to participate in any number of individual surveys.

What can you expect?

- We take the hard work out of surveying your stakeholders.
- We organise your results into key domains of school effectiveness.
- We provide survey reports to give you a simple and efficient explanation of results.
- We benchmark your findings and provide you with access to a custom-built analytics platform to interrogate your data.

How to use the LEAD surveys?

LEAD survey questions are grouped into proven domains of school effectiveness, validated by the University of Cambridge. This helps you interpret your data and provides the basis for school improvement.

By looking across domains and comparing your school's results to the benchmark, school leaders can easily distinguish areas to inform strategic planning.

LEAD survey structure

How to interpret and leverage your results for school improvement:

LEAD domains

Teaching & Learning

- Academic program
- Student learning
- Quality of teaching and learning
- Teaching practice
- Teacher /student rapport
- Transition

Engagement & Wellbeing

- Peer relationships
- Parent Involvement and satisfaction
