

The Learning Blueprint for Teachers

Boosting student outcomes through learning sciences

Enhance teacher practice and improve student performance with the Learning Blueprint for Teachers. It is comprised of 4 base modules, each of which includes approximately 8 hours of learning and application/practice.

Delivery

We recommend that the Learning Blueprint be completed by all teachers within a school or learning cohort simultaneously. This format requires scheduling five, 90-minute live sessions with all participants present.

If completing the program as a group is not an option, the program can be completed on an individual, self-guided basis within a single term or over a multi-year period to embed the full benefits.

Price per educator

Individual or group

- ISV Member Schools: \$300 (per module)
- All schools: \$500 (per module)
